## ONCE THERE WAS A VALLEY

Once upon a time there was a Valley, so rich in vegetation, so filled with wild game and the streams flush with fish, that here was an easy place to live.

A toughened, roving band of Indians peering into this valley decided to settle there. But, with the years, they became soft, lazy and indifferent to their good fortune.

Years later the prosperity of the Valley attracted another band of Indians, who were as toughened and hard-fighting as the first were when they stumbled onto the Valley. The indolent and easy going tribe was quickly overcome by force and made to give up everything to the stronger men.

The moral is clear. The material things we have are only loaned to us as long as we are able to protect and preserve them. When we become indifferent and careless of our possessions, they are taken from us by forces more aggressive.

And so with business; it is ours to possess only as long as we continually strive to protect it and to serve better those with whom we deal. We must be forever diligent and always endeavor to give more service than we ever expect to be paid for.

"Gloeckner" policy is to give this "extra" something. Countless miles are travelled by our staff, constantly checking our sources of supply. Our organization tries to be well informed that we may better assist you and dependable, so that you do not miss a crop.

We have tried to be alert to protect the business we have the good fortune to possess.

## BUSINESS TERMS

2%, 10 DAYS, 60 DAYS NET FOR CUSTOMERS OF APPROVED CREDIT

Prices in this catalog are subject to change without notice . . . All goods are offered subject to Crop Failures, Shortages or other causes beyond our control, and to being unsold on receipt of order . . . The prices in this catalog are for the trade only. For your own protection do not loan this catalog to anyone not entitled to Florists or Wholesale prices . . . Unknown correspondents desiring to open an account are requested to furnish three trade references with whom they have had credit relations.

We, Fred C. Gloeckner & Co., Inc., give no warranty, expressed or implied, as to the productiveness of any seeds, bulbs or plants we sell and we will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price.

In addition to seed, **Gloeckner** bulbs, plants and cuttings are selected with diligent care as to type, productiveness and freedom from disease so you may have the best upon which to build your prospective crops.

## COVER MAN 1949

Carl J. Klemm, born Wurtenburg, Germany 1872. Worked as apprentice under G. G. Hoffmann of this same city until coming to America in 1892. Worked in Iowa until he came to Philadelphia in 1903, here starting work for Hugh Graham an old and well-known florist of that period. He was general manager for the Firm of Julius Wolff for 39 years, from 1905 to 1944 when the business closed, due to the retirement of Mr. Wolff. He is at present manager of the greenhouses for J. J. Habermehl Sons, Philadelphia, a renowned firm. Mr. Klemm's kindly face reflects the pleasure and knowledge he has acquired through the years working hand in hand with nature. His practical experience has placed him in the high brackets of old school growers, although he received no scientific instructions in the past, he likes the present-day methods, as they prove his point by shorter routes.

Gloeckner

New and Outstanding Selections  
THAT DESERVE SPECIAL CONSIDERATION

## CINERARIA SITER'S HYBRIDS

This is an entirely new group of Cineraria hybrids, blending for a perfect color combination from the bright eye types through the finer pastel shades. These new types carry large flower heads with medium, large individual flowers. They are a distinct improvement over the original Siter's Strain, and because they are hybrids, cannot be offered by anyone but the originator.

Seed for 1000 plants ... \$10.00  
Seed for 500 plants ... 5.00

## ANTIRRHINUM TETRA MIXED

Antirrhinum Tetra Mixed is one of the most satisfactory outdoor Snapdragons offered to date. Being a Tetra, it is a vigorous grower and the large husky plants sell quickly from flats. Blooming size plants are tall with finger-thickness stems which keep the spikes erect and the tips straight. Flowers are large and mostly ruffled. Colors cover the full range with a majority of flowers richly veined.

Tr. Pkt. 1/4 oz.  
\$ .50 \$2.50

## LARKSPUR REGAL STRAIN REGAL ROSE

Long spikes of large, well spaced florets distinguishes this strain of Larkspur from all others. It retains the desired height and basal branching habit of Imperialis, but has Delphinium-like florets on long thick spikes.

Tr. Pkt. 1/2 oz. Oz.  
\$ .50 \$1.50 \$2.75

## PETUNIA NANA COMPACTA INNOCENCE (FRINGED)

This new strain of pure white Petunia has the very compact habit of Snowstorm with pure white flowers of the well-known Lace Veil. We feel that this is a desirable addition to the list of Petunias especially for use in borders and pot plants.

Tr. Pkt. 1/64 oz. 1/32 oz.  
\$1.00 \$3.00 \$5.50

New and Outstanding Selections  
THAT DESERVE SPECIAL CONSIDERATION

**ASTER  
PRINCESS  
LINDA**

This variety brings a new florist color to the Princess Type Aster. It is pure rose, which is desired by most florists. Flowers have double crested centers with multiple guard petals. Plants well branched about 2-2½ ft. high.

The Princesses are ideal cut flower types and if you have not grown any of these we suggest that you try Linda as well as some of the other Princess Types, which we list in another section of our catalog.

Tr. Pkt.	1/4 oz.	Oz.
\$ .50	\$ .80	\$ 2.75

**ASTER  
CHINENSIS**

**Upright Single Rainbow Mixed**

This is an upright form of the single Chinensis Aster and is gaining popularity throughout the country as an ideal cut flower. While some of the markets do not want this Daisy-like Aster, we recommend that you try some as we think you will be well pleased with it.

Tr. Pkt.	1/4 oz.	Oz.
\$ .25	\$ .45	\$ 1.65

**MARIGOLD  
FRENCH DOUBLE  
SPRY HYBRIDS**

A new hybrid strain of miniature Marigold which produces an abundance of varied flower combinations in new and unusual color combinations in yellow, red, scarlet and orange. Each plant is symmetrical and makes a neat, compact growth. Dwarf uniformity of this strain blends itself to border plantings and beddings.

## ANTIRRHINUM

### WINTER SNAPDRAGONS FOR GREENHOUSE CULTURE

Early flowering varieties of Antirrhinum have been developed through constant breeding. They are not the largest flowering but are of medium size which have been in favor with the retailer. For Spring flowering the varieties producing larger spikes should be grown.

Seed should be sown late in June or early July for Winter flowering. High temperature inhibits germination of the seed and one must, therefore, select a cool location for the seed flats.

Damping off is a serious problem and all precautions should be taken to avoid it. The soil should be sterilized with steam or other efficient measures and after the seed germinates good circulation of air and very little watering will help to prevent this trouble.

Experiments have shown that Snapdragons do better if the fertilizer content in the soil is not very high. This is one of the easiest crops to grow when planted in fresh soil and grown in a well ventilated cool greenhouse. SNAPDRAGON WILT is usually caused by a single, soilborne fungus — Verticillium which also causes Seidewitz Disease or wilt of Chrysanthemums. The only positive prevention for this disease lies in the exclusive use of sterilized soil, from the seed flats to the final potting or benching soil. Do not invite trouble by planting this crop in old mum soil unless it is first sterilized.

Branching Single Rainbow Mixed.....	\$ .25	\$ .45	\$1.65
Upright Single Rainbow Mixed.....	.25	.45	1.65

### SUPER GIANT (Non-Resistant)

This is the largest and most fully double Aster class known. Plants about 2 1/2 feet tall.

	Tr. Pkt.	1/4 oz.	Oz.
El Monte—Crimson .....	\$ .40	\$ .85	\$3.00
Los Angeles—Shell pink.....	.40	.85	3.00

### TILFORD'S STRAIN

	Tr. Pkt.	1/4 oz.	Oz.
Deep Rose .....			\$1.00
Purple .....			1.00
Shell Pink .....			1.00
White .....			1.00

### BEGONIA

Soil to be used for seed flats should have two parts leaf mold, two parts well rotted manure, two parts soil and one part sand. Steam sterilize the flats and soil about one week before sowing, also water the soil well before sowing. For four inch plants for Spring sale sow seed in August. If 2 1/4 inch plants are wanted for Memorial Day, sow seeds in December. Many growers make monthly sowings from August to March.

For potting soil use the same mixture as above but add more soil and a three inch pot of Electra or complete fertilizer, to 2 1/2 bushels of soil.

Begonia seed will germinate better in a temperature of 60-70° F. Grow Begonias in 55° temperature.

Mite, Nematode and Aphis are sometimes troublesome.

	Tr. Pkt.	1/64 oz.	1/32 oz.
Adeline—Dwarf bright pink.....	\$1.00	\$2.50	\$4.50
Carmen—Compact well formed variety with greenish bronze foliage and clear rose pink flowers .....	1.00	2.25	4.00

Scandinavia—Free flowering. Bright rose pink.....	1.00	2.75	5.00
Tuberous Rooted Mixed—Camelia flowered double type .....	2.50		

# 8 FLOWER SEEDS

## CALCEOLARIA

The soil used in germinating the seeds should be made up of two parts leaf mold, two parts well rotted manure, two parts soil, and one part sand. Sterilize the soil and flat with steam to eradicate all disease.

Sow the seeds lightly over the surface and cover the flat with a suitable covering. Calceolaria will germinate better when the temperature is cool, therefore, well shaded locations are better. August sowing will make large plants for May while November sowing will make good four inch plants. Some growers have used the wick irrigation method to germinate the seed with very good results.

### GILBERT'S STRAINS

This is an improvement over the original Multiflora Nana type. Compact habit of growth; good selection of colors in the mixture; excellent foliage.

	Tr. Pkt.	\$1.00
Multiflora Nana Red.....		
Multiflora Nana Yellow.....		1.00
Multiflora Nana Mixed.....		1.00

Triumph Strain (Grandiflora)—Large flowered strain, the best in its class \$1.00

## CHRYSANTHEMUMS (Annual)

Another group which is finding favor with florists for cut flower material. Chrysanthemums last remarkably well as a cut flower, but for best results keep them in water 24 hours before marketing. Sow in mid August to follow early Chrysanthemums. Responds very well to additional light.

	Tr. Pkt.	Oz.
Mixed .....	\$ .15	.60

## CLARKIA (Elegans Double)

For spring flowering sow in early January and grow in shallow soil in flats or benches. Keep plants on the dry side as vigorous growth is not wanted.

	Tr. Pkt.	Oz.
Mixed .....	\$ .20	\$1.25

## COLEUS

Gymnocarpa—(Dusty Miller) Fine silvery foliage.....	.20		.75

## CELOSIA

### PLUMOSA

	Tr. Pkt.	1/4 oz.	Oz.
Fiery Feather—Similar to Flame of Fire, but taller and with somewhat smaller plumes more freely produced .....	\$ .40	\$1.25	\$4.00
Flame of Fire—Fine dwarf type fiery red.....	.50	1.50	
Golden Feather—Habit same as Fiery Feather, but with golden yellow plumes.....	.40	1.25	4.00
Golden Plume—4 ft. golden yellow, for cutting.....	.30	.60	2.00
Pride of Castle Gould—Deep crimson to light yellow.....	.20	.55	2.00
Thompsonni Magnifica Finest Mixed—Excellent strain.....	.35	.60	2.25
Scarlet Plume—4 ft. scarlet.....	.30	.60	2.00

### CRISTATA

	Tr. Pkt.	1/4 oz.	Oz.
Dwarf Golden Yellow.....	\$ .30	\$ .60	\$2.25
Dwarf Empress—Deep scarlet bronzy green foliage.....	.30	.60	2.25
Gilbert's Maple Gold—Beautiful combs varying in color from light to dark pink tipped with Gold. Grows 2 to 3 feet high.			
Originators Tr. Pkt. (300 seeds).....			\$ .50

## CINERARIA

### SITER'S HYBRIDS

They are a distinct improvement over the original Siter's Strain, and because they are Hybrids from individual crosses, cannot be offered by anyone but the originator.

This is an entirely new group of Cineraria Hybrids, blended for a perfect combination of colors, ranging from bright-eyed types through the finer pastel shades.

These new types carry large flower heads with medium, large individual flowers.

Seed for 1000 plants.....	\$10.00
Seed for 500 plants.....	5.00

Cremer's Prize Strain—This strain has been greatly improved by the originator—has small foliage that is wilt-proof with tremendous heads of flowers of the brightest colors.

Tr. Pkt. \$1.50	1/32 oz. \$4.00	1/16 oz. \$7.50
-----------------	-----------------	-----------------

Positively do not use soil that was previously used for Mums and especially so if your Mums were affected with Verticillium wilt or Seidewitz disease. CINERARIAS are attacked by this wilt which is a soil borne fungus. It will cause the lower leaves to wilt and die and then gradually kill the entire plant. The only prevention for this trouble is to use new field soil from seed flats to finished pot. If you do use old chrysanthemum soil be sure to sterilize it. To be on the safe side it is recommended to steam sterilize soil before using.

## COSMOS

### SENSATION

	Tr. Pkt.	Oz.
Pinkie—Delightful rose pink.....	\$ .25	\$1.15
Purity—Glistening white .....	.25	1.15
Crimson—Deep red selection of Sensation.....	.30	1.75
Radiance—Deep rose with band of rich crimson.....	.50	2.50
Mixed .....	.25	1.15

# Gloeckner FLOWER SEEDS

## DELPHINIUM

### VETTERLE AND REINELT PACIFIC STRAIN

This is the finest strain of Delphinium yet introduced. From our personal observations in the field, we find this has unquestionably proven to be the leader in Delphiniums of the better type. The flowers are immense in size, well set on strong, straight stems, do not shatter, and are 40 to 90% mildew resistant. July or August sowing and transplanting into the field during the fall will produce an early crop with large spikes. Delphinium's require a well drained soil, neutral in reaction. January sowing will produce flowers during the summer.

#### BLACK KNIGHT

The individual florets, 2 to 3" in diameter, are **Dark Purple**, beautifully rounded form with heavy velvety texture. Very large well formed spikes.

#### BLUE BIRD SERIES

This series can be recommended as being the **clearest medium blues with white bees**. They carry well formed round flowers 2 1/4 inches in diameter on very long, graceful spikes.

#### BLUEJAY SERIES

Color striking. **Clear medium to dark blue**. Very intense and alive with contrasting bee.

#### CAMELIARD SERIES

A pure lavender self, with white bee, individual flowers, are very round and flat. Excellent growing habits.

#### GALAHAD SERIES

Flowers **Clear White**, averaging three inches in diameter, pyramidal spikes, good branching habit, strong whippy stems with a high percentage of mildew resistance.

#### GUINEVERE SERIES

**Light Pink Lavender self with white bee**. Individual florets 2 1/2 to 3 inches in diameter. For cut flowers and show purposes. Mildew resistance—50 to 70%.

#### KING ARTHUR SERIES

**Brilliant Royal Violet with large white bee**. Individual florets 2 1/2 inches in diameter. Excellent for cut flowers. Mildew resistance from 80 to 90%.

#### LANCELOT SERIES

**Clear Lilac self with white bee**.

#### PERCIVAL SERIES

A companion to the Galahad Series. Large **glistening white** flowers with strongly contrasting **black bee**.

#### ROUND TABLE SERIES

This represents all the color combinations of the Knights and their Ladies which will eventually be introduced. Some three hundred different crosses were used to make up this group.

#### SUMMER SKIES SERIES

**Clearest Light Blue** with white bee. Individual florets 2 to 2 1/2 inches in diameter. Ideal for cut flower purposes. Mildew resistance—40 to 60%.

#### ALL COLORS MIXED

A blend containing all named colors mentioned above. Prices for above varieties.

## CYCLAMEN SEED

This strain is produced by one of the foremost Cyclamen specialists in Europe and is considered outstanding.

We feel that the new colors offered in this strain are vitally necessary if renewed interest is to be aroused in the production and use of Cyclamen.

An asterisk has been placed before the colors which are considered the best of the newer shades. The standard shades are also included and are considered exceptional.

### DAUERNHEIM STRAIN

This strain is compact, free flowering and matures early. Tests have shown that it is more disease resistant and will do very well under conditions here in the States. The foliage is of medium size, the blooms well proportioned are particularly large, the white and white with eye often measuring six inches across.

Dauernheim's have selected and improved this strain for a number of years and in their trials have found this strain to be superior.

### DAHLIAS

These are easy to raise from seed and are overlooked by many florists. Vast improvements have been made in these strains which come remarkably true to type and height. They are early flowering, blooming profusely the same year they are sown.

For small pot plant sales in the spring the seed should be started during January or February. To produce four inch pot plants for Mothers Day sow the seed in November.

### REGAL STRAIN

Long spikes of well placed florets distinguishes this new strain from all others. It keeps the desirable height and basal branching habits of the Giant Imperials.

	Tr. Pkt.	1/2 oz.	Oz.
Regal Rose—Rich rose.....	\$ .50	\$1.50	\$2.75

### SUPREME STRAIN

A new strain of the popular Giant Imperial or Base Branching Type of Larkspur. Plants have an upright habit of large center or main flower spikes, which are formed by a great many fully double, large flowers with broad petals closely and well spaced on the stem.

	Tr. Pkt.	Oz.
Dark Blue Supreme—Rich violet purple.....	\$ .40	\$1.50
Lilac Supreme—Clear lilac.....	.40	1.50
Pink Supreme—Clear rose pink, deeper in color than Pink King and Los Angeles Improved.....	.40	1.50
Rose Supreme—Clear, pure deep rose.....	.40	1.50
Salmon Supreme—A true shade of real salmon.....	.40	1.50
White Supreme .....	.40	1.50
Supreme Mixture .....	.40	1.50

Larkspur seed may be sown directly in the open in the fall and will flower the following spring. There are two distinctly different methods used and each have a number of successful supporters. The first method is to sow the seed fairly early in the season about August 15th to September 15th. The small Larkspur seedlings will be sufficiently large enough when cold weather sets in to winter over when given a light mulch. The other method employed is to sow the seed in rows in late October or early November so that it will not germinate until early next spring. This crop of Larkspur will generally come in shortly after Delphinium Belladonna.

# FLOWER SEEDS

## GIGANTEA

A remarkable new sweet scented, robust growing extremely large flowered type, ideal for show purposes, florist use and garden decoration. It has also been tested and found good for greenhouse culture.

Wyaston Wonder—Bright crimson	1.50	2.50	4.50

## PRIMULA

## MALACOIDES "SPRINGTIME"

SPRINGTIME is one of the finest Malacoides ever offered. This color is an attractive SALMON pink which does not fade with age. The flower stems are strong and support a profusion of good sized blooms; and unlike many other varieties of Malacoides, the foliage has good texture and is fairly resistant to rot. Thus the outstanding features of this variety are its pleasing salmon pink color, compact habit of growth and excellent keeping quality.

Seed sown in June will make good flowering plants for January. September sown seed will produce good plants for early Spring; while later sowings can be sown into small plants usable in combinations.

TRADE PACKET—\$2.00

Imperial Hybrids—(New)—Large flowers with strong stems. Mixed salmon and rose shades.....	.35	2.25

# Gloeckner FLOWER SEEDS

## STOCKS

Stocks are very satisfactory for Winter and Spring flowering. Sowing the seed in August and benching in October, the first flowers may be cut before Christmas if additional light (40-60 watt lamps spaced 5 feet) is used. Without this aid the crop will come into flower in January. Continuity of bloom may be obtained by successive sowings. This non-branching type, which has come into general use, should be planted 3 inches in the row and 6 inches between rows, producing a single stem. The branching types should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

Flowering of stocks only occurs when the temperatures are below 60 degrees for the greater part of the night. To secure the greatest percentage of doubling the largest and most vigorous plants should be selected.

### NON-BRANCHING

#### (Excelsior Column Stocks)

	Tr. Pkt.	1/4 oz.	Oz.
Apricot—Large flowered creamy buff.....	\$1.00	\$2.50	\$9.00
Dark Blue .....	1.00	2.50	9.00
Deep Apricot (New).....	1.00	2.50	9.00

White .....	1.00	2.50	9.00
Yellow Wonder—Rich creamy yellow with full double florets well arranged on long spikes.....	1.00	2.50	9.00

The CHRYSANTHEMUM-STOCK planting succession is dependable and profitable. Refer to Gloeckner's 1949 Chrysanthemum Manual for a complete listing of varieties.

### GIANTS OF CALIFORNIA

#### (Branching)

The Giants of California can also be grown similarly to the non-branching type. When grown this way the side shoots should be removed. For the retail grower the branching types are gaining popularity. These should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

	Tr. Pkt.	1/4 oz.	Oz.

**CUTHBERTSON**  
 SPRING FLOWERING

This new class of Sweet Peas has taken the place of the "Spring Flowering" types previously offered. Indoors, Seed should be sown November 1st, and such planting will start to bloom in April. The Cuthbertson Class is recommended for sowing after November 1, and not earlier because they need the stronger Spring sun to bloom.

They are exceptionally successful out of doors. In the North, they flower two weeks later than the Early Flowering, and two to three weeks earlier than the Summer Flowering.

## PERENNIAL SEEDS

### CAMPANULA

**Calycanthema**—(Cup and Saucer). One of the most showy of this group. The flowers are large on stalks that attain a height of about 2 feet. Good for cutting.

	Tr. Pkt.	Oz.
Blue	\$ .25	\$ 1.75
Lilac	.25	1.75
Pink	.25	1.75
White	.25	1.75
Mixed	.25	1.75

**Persicifolia**—(Peach leaf, bell flower). This variety grows from 2 to 3 feet tall and produces flowers that are more shallow than bell shaped and has foliage that is long, narrow and very graceful.

Blue—Very hardy	Tr. Pkt.	\$ .50
Alba—Very haray		.50

**Pyramidalis**—The Chimney-Bellflower is one of the tallest Campanulas attaining a height of about 5 feet. Its long stalks of flowers start blooming in August and continue for several weeks.

Alba	Tr. Pkt.	\$ .35
Blue		.35

**Rotundifolia**—Scotch Harebell is an attractive flower producing little bells of blue during late spring and continuing over a long season. Grows 12" tall

	Tr. Pkt.	\$ .50
--	----------	--------

### CARNATION

Early Vienna—Very dwarf	Tr. Pkt.	1/4 oz.
Grenadin Mixed	\$ .50	\$ 2.75

### CENTUAREA

**Montana**—Has numerous deep blue flowers resembling Centaurea Cyanus on plants growing about 1½ feet tall. Flowers early

	Tr. Pkt.	\$ .50
--	----------	--------

### CHIERANTHUS (SIBERIAN WALLFLOWER)

**Allioni**—The Siberian Wallflower, a biennial, produces its bright orange flowers on 15" spikes from May to September. To keep plant blooming, flowers must be cut

	Tr. Pkt.	Oz.
	\$ .15	\$ .35

### CERASTIUM

**Tomentosum**—Snow in the summer is a very descriptive name for this low-growing white flowered and silvery foliated plant. Grows about 6" high. Its small white flowers are produced in June. Excellent for rockeries

	Tr. Pkt.	Oz.
	\$ .30	\$ 1.75

### COREOPSIS

**Lanceolata Grandiflora**—Plants grow about 3 feet tall and produce their yellow daisy-like flowers during June. Good for cutting

	Tr. Pkt.	Oz.
	\$ .15	.30

**Mayfield Giant**—Deep golden yellow, large flowers, early

	Tr. Pkt.	Oz.
	.25	.75

**Double Sunburst**—Large, golden yellow, fully double flowers

	Tr. Pkt.	Oz.
	.25	1.00
